Working title of the project:

Pattern of ALCOHOL use RELATED FIGHT : a comparison between many european country

Abstract: (Please describe objectives, methods and specify the research question(s), maximum 250 words.)

Objective: To assess the specific relationships between drinking patterns and fight related to alcohol and investigate the risk factors associated with alcohol related fight in many european country , proposing a comparison. T

Methods: Data used for the analyses are a part of the ESPAD 2007 data collected he outcome variable is the declaration of fighting because one's alcohol use during the last 12 months. To assess the specific relationships between drinking patterns and related fight in both countries the attention is focused also to family structure, mother and father's education, parental care and control on outings, parental warming and school achievement. Drinking frequency and patterns and consumption of other psychotropic substance (tobacco, cannabis and stimulants) was considered too.

Resarch questions: to understand the complex relationships among various factors and the identification of possible interventions for drug use prevention.

Planned type of publication: Paper/article Report PhD
 Other, which:

Variables to be included in the analysis:

¹⁾ This can only be a Principal Investigator or a Chair of an ESPAD Thematic group. When the application is approved the Principal Investigator/Chair of a Thematic group has to sign an agreement that the delivered copy of the 07 Database only will be used for the applied project and that the database will be handled according to the rules in the document "Rules for the use of ESPAD databases".

all

Countries to be included in the analysis:

- All accessible countries (Level 2)
- A more limited number of countries, namely:
