**Person responsible for the analysis** Patrick Lambrecht & Patricia Holsters

### Details of planned work

**Type of publication**       Paper/article       Report       PhD  
    Other, which:    Masters program

**Working title of the publication**    The frequency of ecstasy use related to behavior problems among European adolescents

**Research question(s)**    Statistic analyses will be used to examine the relationship between ecstasy use and conduct problems. The hypothesis: higher frequency of ecstasy use increases problem behavior. Thereby I assume that adolescents who frequently consume ecstasy display more behavior problems compared to adolescents who don't use ecstasy. Research reveals whether there is a difference between regions with common use of ecstasy with respect to regions with a minority of ecstasy using adolescents.

**Variables to be included in the analysis**    all variables on demography, alcohol consumption, smoking, drug taking and delinquent behavior, namely Q 1, 2, 4 , 22, 27 - 37, 39 40-42, 45, B3, B4, C1, C4-C5, D1, D2.
